Subject: AOGA Response to Revised EPA-DEC list of questions

Hanh and Wade,

Please find attached AOGA's collective response to the revised list of scoping questions from your agencies. We summarized the expected level of geotechnical activities in Table 1 of the attached document. This table and our collective responses are subject to future revision and I understand AOGA's response does not currently include one or more operator's expected numbers. When we receive those numbers and comments, we will revise and update you. For your information, ExxonMobil, Statoil, and Eni do not anticipate conducting any geotechnical activities in 2014-2019. Please let me know if you have any questions, and we look forward to working with you through this process!

Have a great weekend.

Best,

Nikki C. Martin

Subject: Revised EPA-DEC list of questions

Thank you again for attending the geotech permits scoping meeting yesterday. We at EPA, and I am sure DEC as well, really appreciate the discussion and information shared at the meeting by industry members and our federal and state partners.

As promised, attached is the revised list of questions. We would appreciate your written input by Friday, May 10 in order to refine the scope of the permits and supporting documents. Also, as we discussed, please feel free to include additional questions/information you may want EPA and DEC to consider.

Nikki and Dan - Since I don't yet have a copy of the sign-in sheet and do not have email addresses for everyone, please forward this email to other meeting attendees in your group, and to those who were not able to participate.

Thanks again and we look forward to hearing from you soon.

Hanh
